

Robyn Anything anyone want to add to agenda? Ok we'll approve that with

The motion at hand is Sarkonak moves to amend the fiscal year end from June 30th to April 30th

Eilish seconds it

Jamie it's a little administrative thing but right now we have two ways of looking at Gateway finances we have a fiscal year and we have a budget year our fiscal year starts July 1st and ends June 30th and our budget year goes from may 1st to April 30th this can create a few problems because we look at finances on two scales even though we look at the same numbers

I want to change it so that it helps us organize things better

According to sjs rules student groups have to have their fiscal year end in April so it would be in best practices also it would help with transitioning new staff also if our year end is in april we can get our audit materials together to help with transition even more to inform the audit.

It's a sticky process if approved here we would change Bylaw then send it to societies alberta then from there the CRA would approve our request they told me it takes three weeks but it could also take months but the goal is to get it done by next year.

Any questions

Nathan: why was it like that to begin with?

Jamie: I'm not sure but since we used to have longer business managers they could do audits during the summer

Robyn: I'll move this to a vote all those in favour passes 22 0 0

That concludes voting requirements that was the only mandatory reports

We'll move into that at the gateway we usually have three reporting editorial online and business we'll do that similarly here starting with Jamie

I sent out a word file with my reports our magazine is holiday themed but we're very excited for the Getaway and providing volunteers that platform in winter semester
